This CME workshop will help you use family history information to identify patients who might benefit from increased cancer screening, genetic testing, and/or referral to a genetics specialist. The program features:

- **Interactive cases** with real-time patient interaction and small group discussion
- **Monthly online educational opportunities** to reinforce and build on skills
- **Access to mobile resources** to help you implement these new skills into practice

This CME workshop will help you hone your skills to better:

- **Identify** patients with high hereditary cancer risk
- **Communicate** benefits and limitations of genetic testing to patients
- **Provide guidance** to patients about risk-reducing options
- **Apply evidence-based guidelines** for clinical management decision-making

**Date and Time:** November 16, 2019, from 9 AM - 5 PM

**Location:** Jacobs School of Medicine and Biomedical Sciences
955 Main Street, Buffalo, NY

**Program Fee:** $65

**To Register:** Visit [buffalo.edu/igl](http://buffalo.edu/igl)
